OVER 160 COMPANIES HAVE CHOSEN US TO LOWER THE EXPENSES RELATED TO IMBALANCES

Cooperation within the ETG Balancing group

ETG is your reliable partner in power sector

7 years of experience in power sector

We have been operating since the beginning of the electricity market

Over 170 partners on the market

More than 170 companies from different regions of Ukraine trust us

Timely payments

Timely payment for the positive imbalance compensated within the Balancing group

Personal support

Individual approach to each member of the Balancing group

Zero disputes and lawsuits

Absence of lawsuits from our clients

High compensation rates

Imbalance compensation rates up to 87%

Why ETG?

Having high volatility in the electricity market, ETG continues to strengthen its reputation as a reliable and stable partner. We apply an individual approach to each participant of the Balancing group, taking into account its specifics and needs, and we create the most preferable conditions for cooperation.

The ETG team constantly monitors the changes in the regulatory framework, in particular, Market Rules, in order to timely adapt internal processes and provide recommendations for a stable and efficient work of the participants.

Transparency

Cooperation with ETG is based on transparent and mutually beneficial conditions

Stability

Our advantage is the ability to adapt to constant changes and challenges in the electricity market, as well as to external factors

Trust

Over 170 partners from different parts of Ukraine have been cooperating with us for a long time

Customer focus

We value each of our clients and are constantly working to improve our work processes

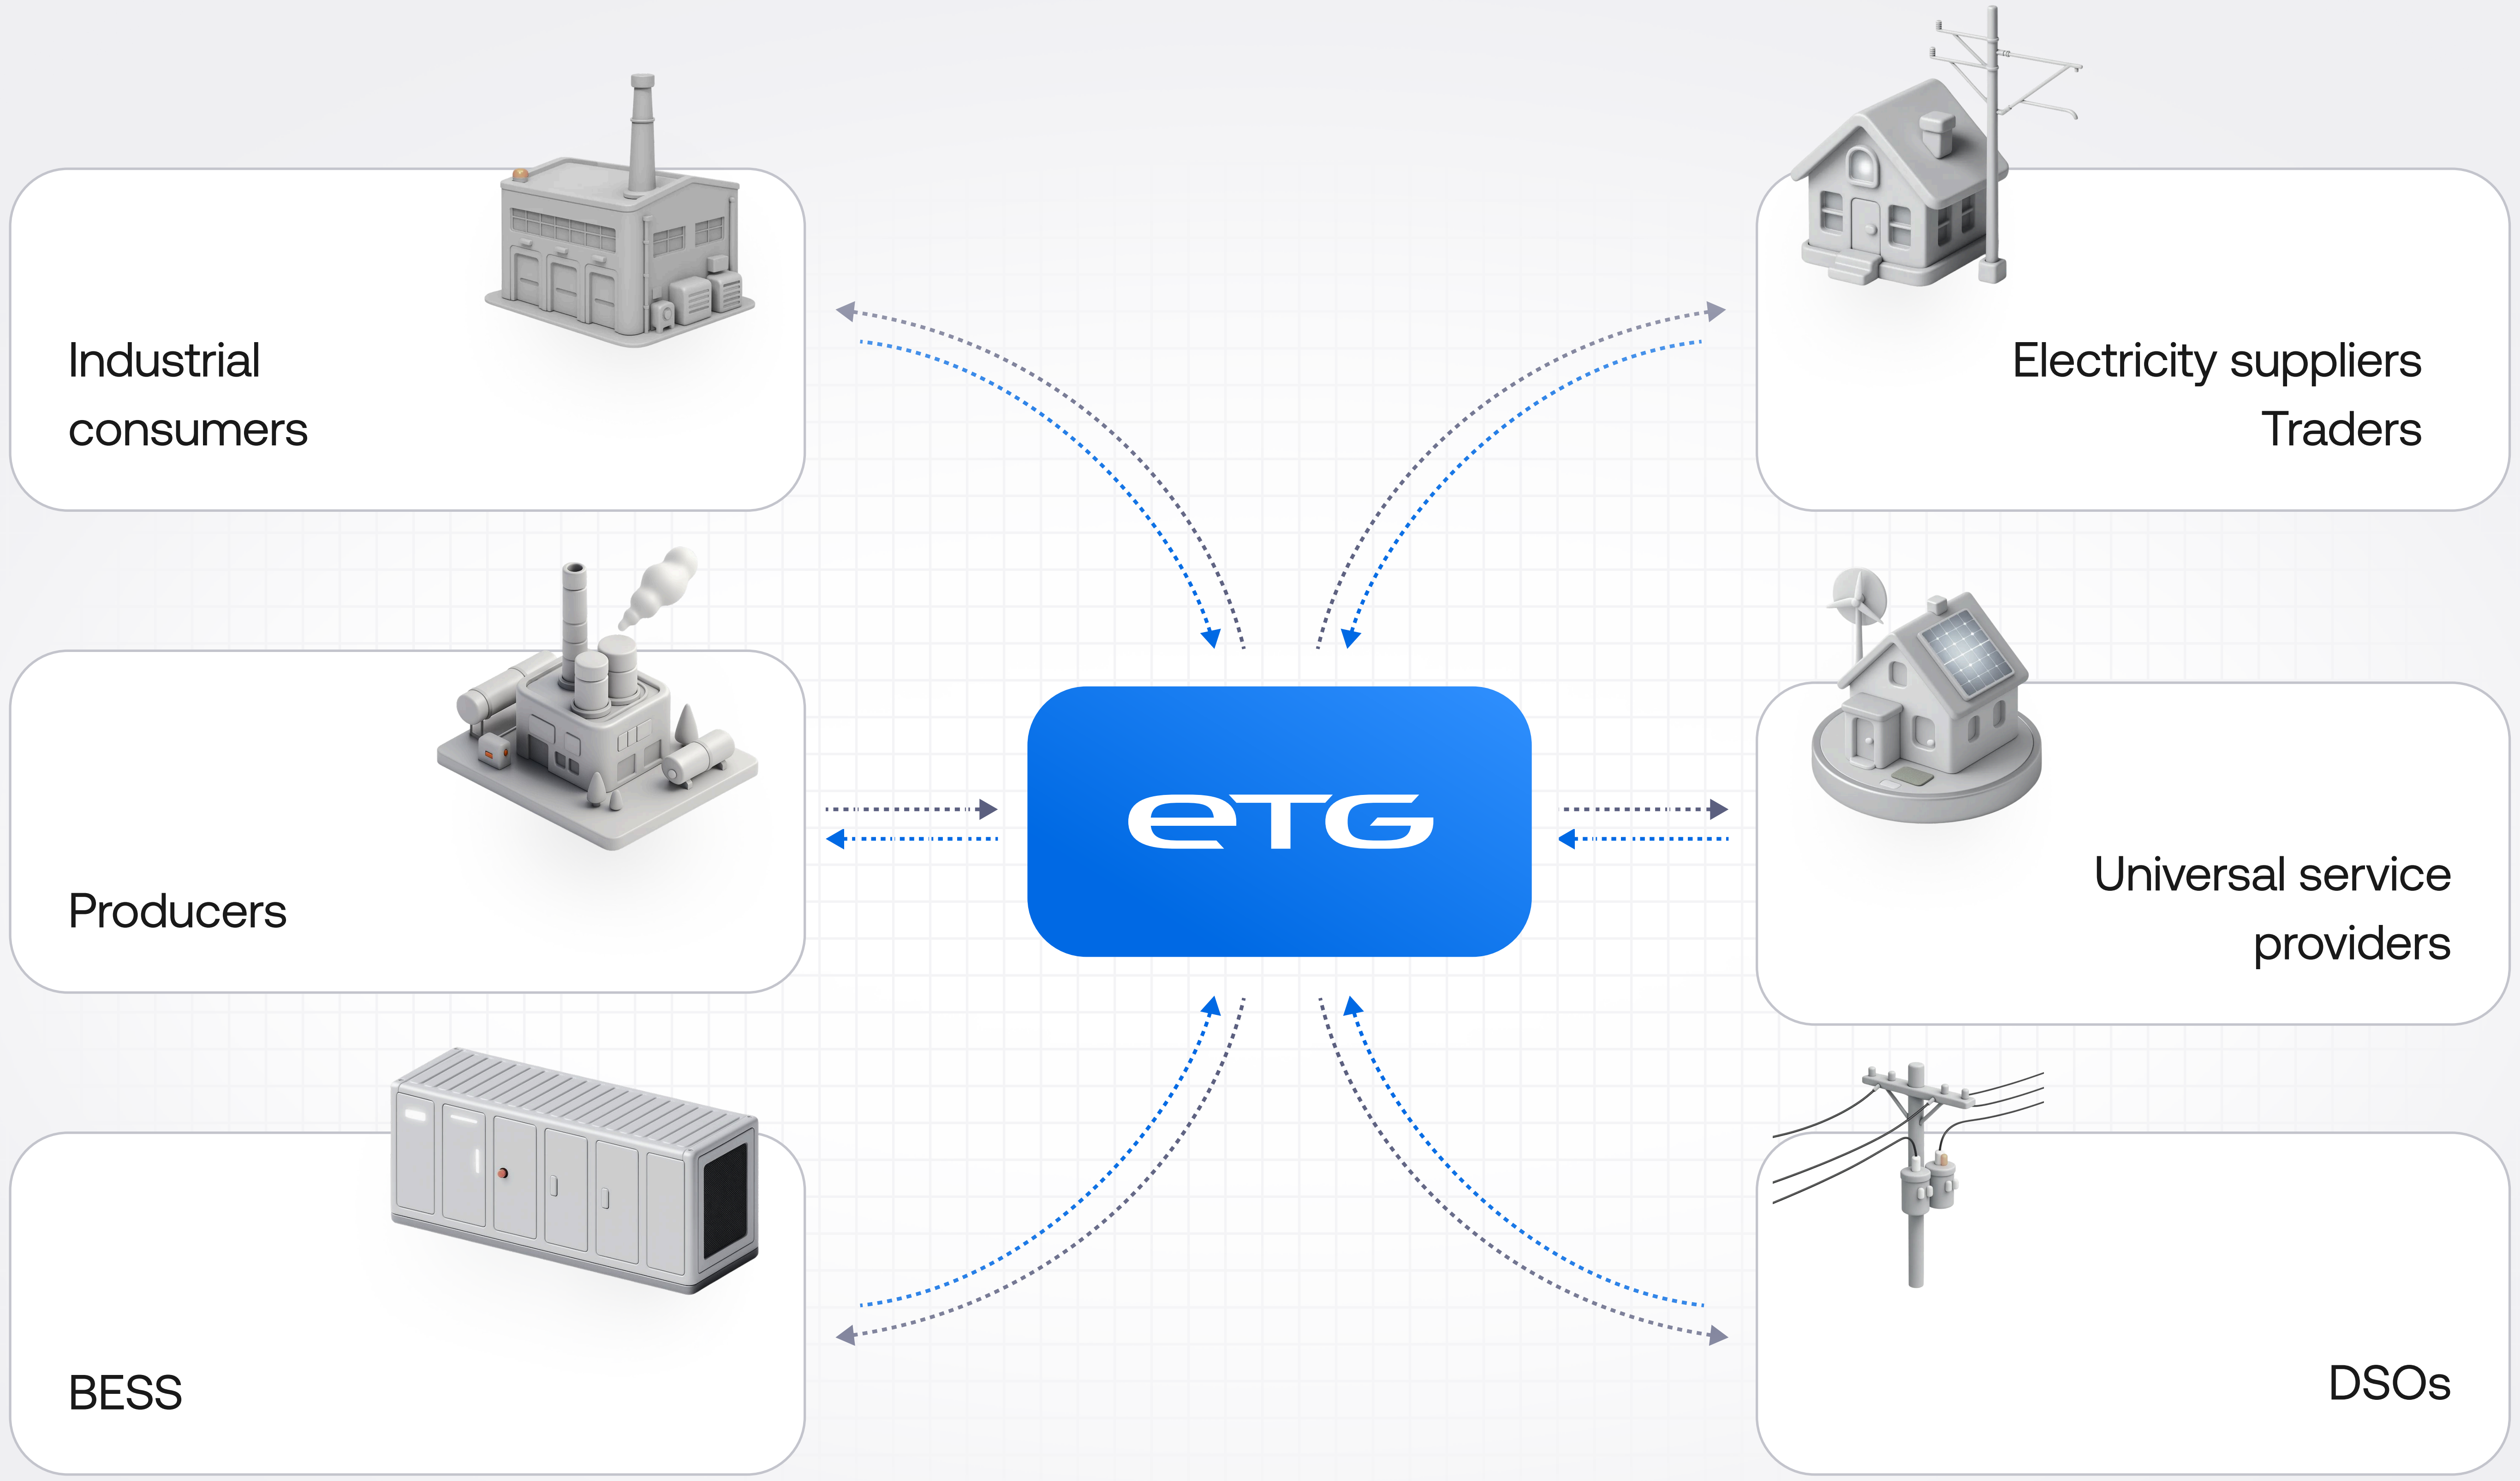
What does Balancing group stand for

ETG is the leading Balancing group in Ukraine

We coordinate the activities of all group members, ensuring mutual compensation of imbalances and maintaining an optimal balance between electricity production, supply and consumption. Thus, ETG guarantees the effective functioning of the group as a single balanced mechanism

The Balancing group includes more than 170 companies from different regions of the country, i.e. electricity producers, universal service providers, electricity suppliers, traders, DSOs and industrial consumers.

The diversified group (generation, supply and consumption) allows for high efficiency indicators of imbalance compensation.

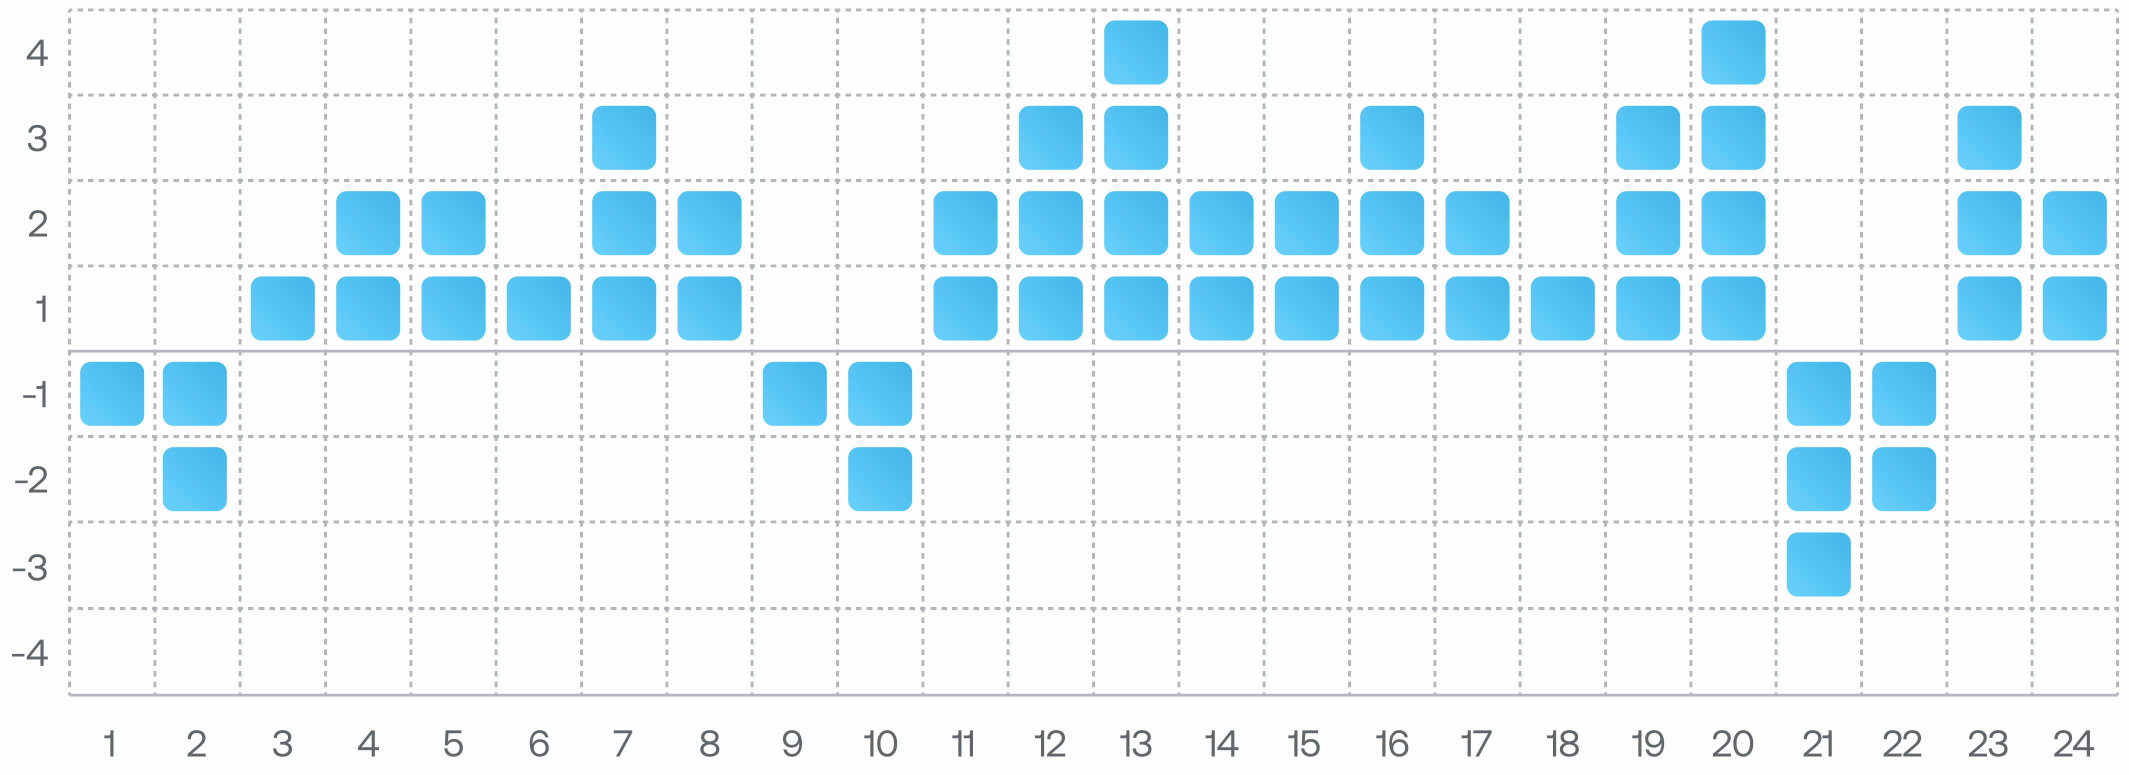


How does a Balancing group work?

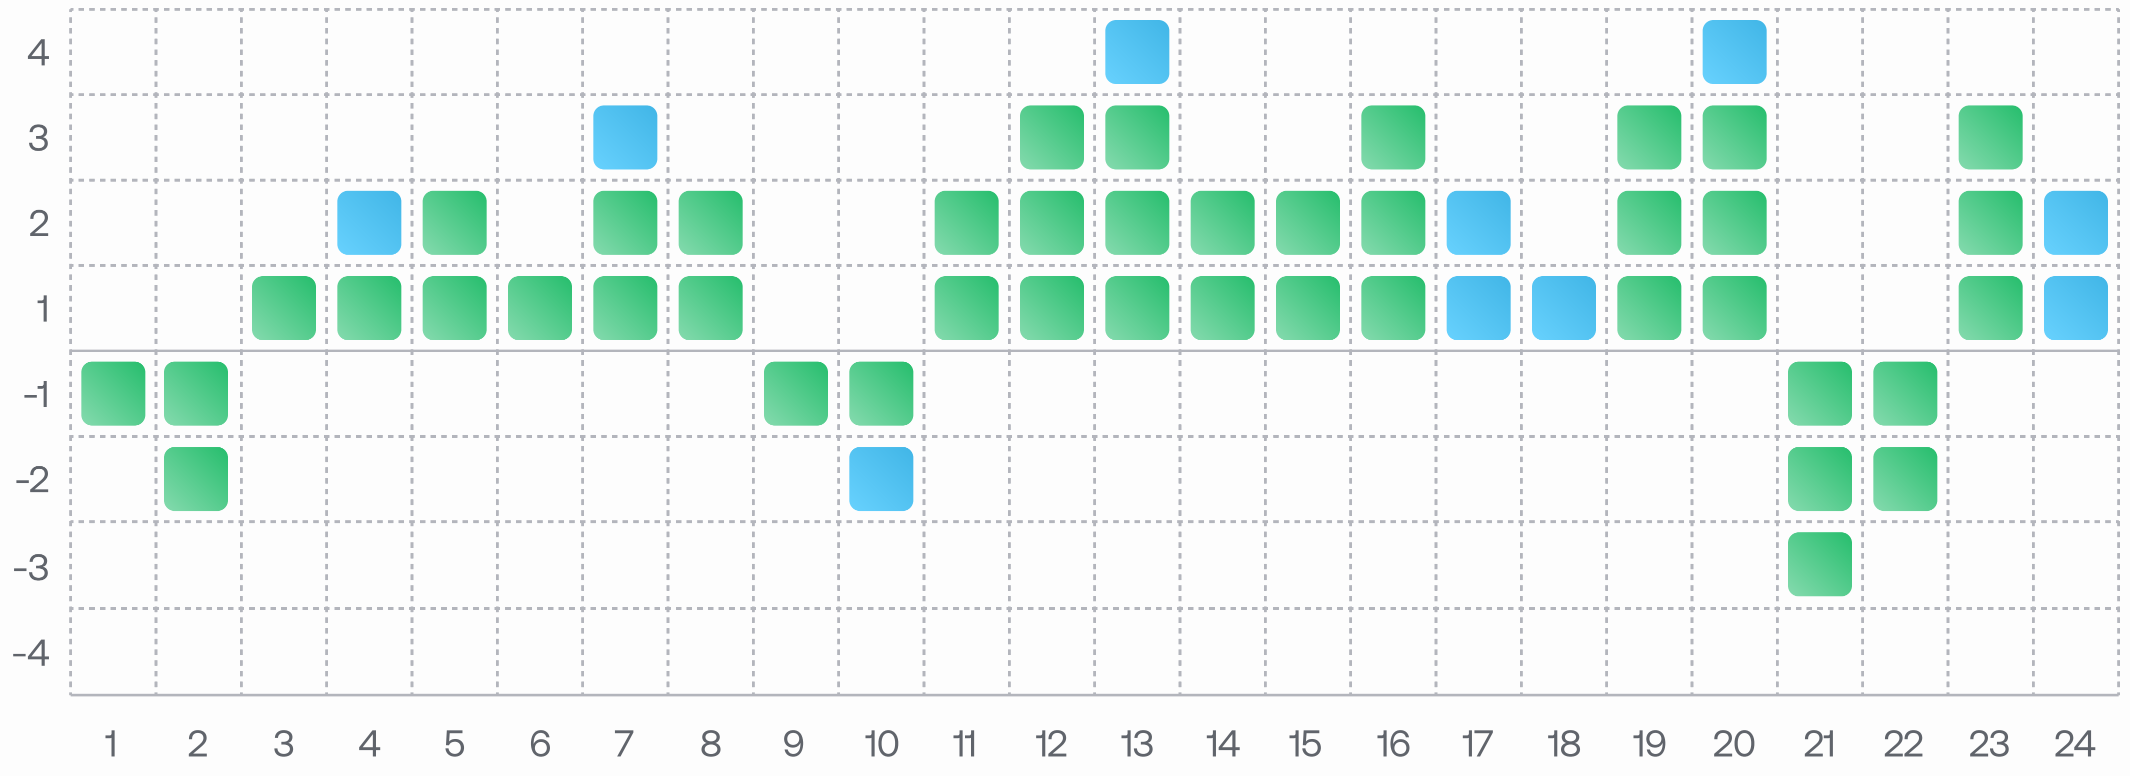
The principle of the Balancing group is based on mutual compensation of imbalances of the Balancing group members. Calculation is hourly based, the imbalance of the member is compensated depending on how the whole group acted at a specific hour.

If the directions of imbalance (positive or negative) of the participant and the one of the group at a certain hour do not match, then such an imbalance can be compensated within the group. If they do match, compensation does not occur. Thus, the participant can sell the surplus or buy the deficit volume at the prices formed within the balancing group.

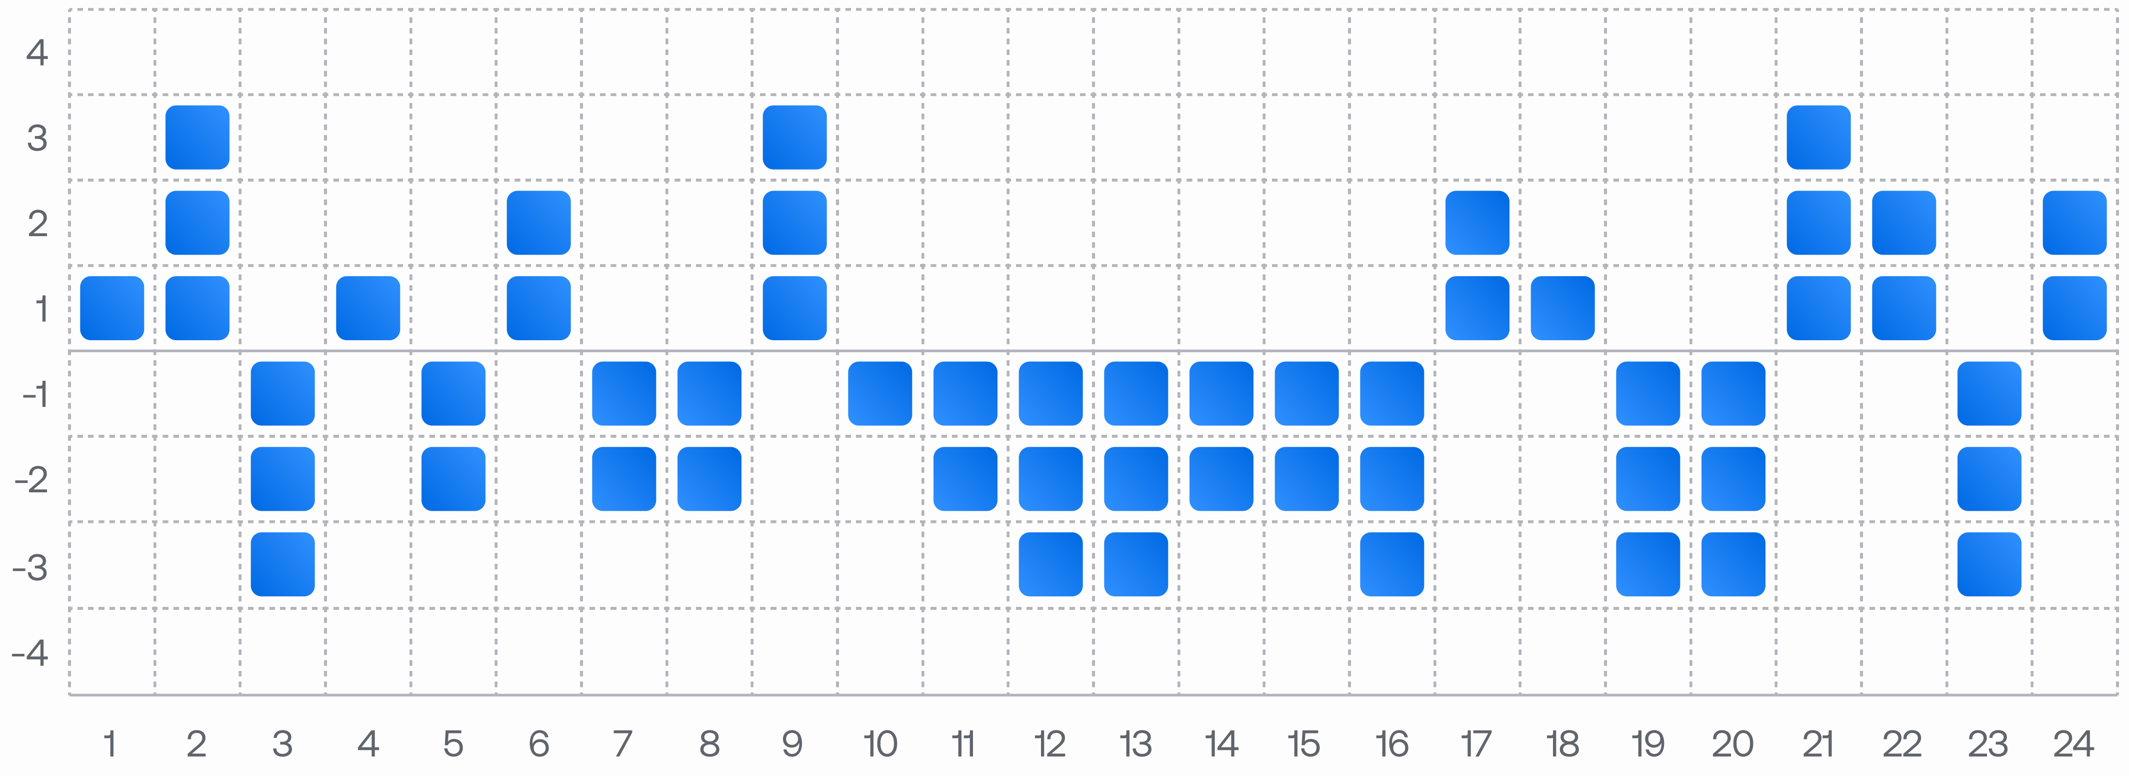
Imbalances



Compensation result



Balancing group imbalances



How does a Balancing group work?

However, when operating individually on the electricity market, the sale of surpluses occurs at a much lower price, which is the minimum value between the Balancing market price and DAM price, multiplied by 0.95.

To cover the deficit, on the contrary, it is necessary to buy at a higher price, i.e. the maximum value between Balancing market price and DAM price, multiplied by 1.05. ETG pays the imbalance compensated within the balancing group immediately, while NPC Ukrenergo makes settlements with significant delays.

Pricing

Cooperation with ETG

Market participant with a positive imbalance (electricity surplus)

DAM price + BRP fee

Market participant with negative imbalance (electricity deficit)

DAM price + BRP fee

Cooperation with NPC Ukrenergo

Market participant with a positive imbalance (electricity surplus)

min. (Balancing market price and DAM price) x 0,95

Market participant with negative imbalance (electricity deficit)

max. (Balancing market price and DAM price) x 1,05

Proposal for participation in the ETG Balancing group

Financial benefit

Compensation for imbalances up to 87%* of the DAM price. Minimal fee from the efficiency provided by the Balancing group

Financial Guarantee

Providing a financial guarantee to NPC Ukrenergo for participating in the market

Settlements

No decade invoicing. Issuance of acts by the 18th day of the month following the settlement month

Payment terms

Payment for compensated surplus within 4 days after issuance of the Act

*To calculate compensation for your company, please provide data on imbalances for the last 1-2 months (on hourly basis)
